

OPERATING INSTRUCTIONS FOR

KWIKSTRAP HEAVY DUTY TENSIONER - 32MM

For use with Tuffstrap™ Polyester Strapping & Buckles

STEP 1

Insert end of strapping through buckle & open leg to form a loop. Pull loop tight around leg.

STEP 2

Wrap strapping around package.

Loop strapping around remaining open leg of buckle. Pull loop tight around leg.

STEP 3

Take the tensioner by the right hand & depress the handle. Place the strap under the gripper so that it touches the housing with the right hand edge.

STEP 4

Release the tension handle. Insert the upper strap into the slot of the housing & the windlass.

STEP 5

Hold the tool with your left hand & move the tension handle back & forth until the strap is tensioned.

STEP 6

Depress the tension handle to cut the strap. While at this position, pivot the tool to the right away from the strap.
